The Future of Daton L. Flucker Is a Scary Place

Death Keeper's Biological Wasteland is one scary novel. This futuristic thriller takes readers 2,000 years into the future, when the word "dead" has no real meaning. It is said that when there is no more room in hell, the dead will walk again.

In the year 4009, the world is in ruins, decaying even as the atmosphere slowly withers away. Garbage is piled a mile high and the smell from the Walking Dead can burn a hole in your lungs.

Daton L. Flucker is a 21st-century rap superstar who is brought back to life in the 41st century as a clone. But Daton is different from the millions of other clones. He is the chosen one, the only person predestined who can bring guidance, hope and a new life to the people of the future. But can he do it? Daton is the Death Keeper.
